

**Biography:**

I was born and raised in Timmins, Ontario. I am currently enrolled in my fourth year of the speech and language pathology undergraduate program at Laurentian University. I hope to continue my studies next year in the graduate program of speech and language pathology. My research interests consist of bilingualism and language in a minority context.

**Research:**

*French acquisition in a minority context from the point of view of parents and teachers*

My research project will focus on French acquisition in a minority context. My project will consist of an in-depth study of answers given on questionnaires. These questionnaires were completed by parents and teachers from the *Conseil scolaire catholique Franco-Nord*, in November 2019. The questions were about the strategies they utilize to teach a minority language to their kid(s) and students. Some of the teachers completed the questionnaire a second time in May 2020. My project will be a qualitative analysis of the answers given at both times by teachers and by the parents. A comparison will be established between both times the teachers gave answers, in order to see if there were any changes.
