**Early experiences and the environments in which children develop in their earliest years can have lasting impact on later success in school and life. (Hart & Risley, 1995)**

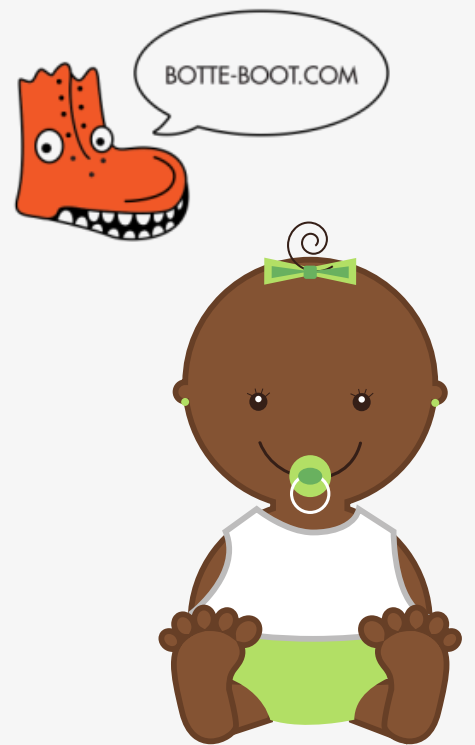

## Communication Intentions 0 - 36 months

How do you know if your child is meeting the milestones of communication development at a very young age? You can observe their communication intentions. From birth, babies communicate their needs and then communicate their wants. This video focuses on the development of communication intentions, how to identify them and what to expect from 0-36 months.

### Resources

If you have concerns about your child's language development or communication intentions, consult a speech-language pathologist. Visit the College of Audiologists and Speech-Language Pathologists of Ontario website to find a speech-language pathologist in your area: [www.calspo.com](http://www.calspo.com). This [fact sheet](#) provides information on language development milestones.

### Podcast

Listen to [Episode 5 \(Season 1\)](#) of The Parlé Podcast for more information on the developmental milestones of communication,

**Stay tuned for upcoming videos, both in French and in English. Visit Chantal Mayer-Crittenden's [YouTube channel](#).**
