EXPOSURE MAPPING

COMMUNITY LANGUAGE VS. TARGET LANGUAGE BOTTE-BOOT.COM

By completing this form, you will get a better idea of how much **exposure** your child is getting in each language on a weekly basis.

Research has shown that children need to be exposed to a language a minimum of **40%** of their waking hours to become proficient in that language.

If your child wakes up at 7:00 am and goes to bed at 8:00 pm, your totals for each day should roughly add up to **11-13** hours of language exposure.

MONDAY		Community Language (ex. English)	Target Language (ex. French)
Home conversations & dialogue (ex. morning routine, supper, exposure to adult discussions, play)			
Daycare			
Outings (family visits, sports, etc.)			
Friends	*		
Electronics (television, tablet, music, etc.)			
Shared Reading

	Share	ed Reading					

TOTAL HOURS

If you are not meeting the 40% of exposure threshold in either of your child's languages, there are many activities that can be done to increase exposure hours.
